### SALIENT FEATURE

- MARSHAL Flour Mills can be operated on a Single Phase domestic supply of 240 Volts.
- Different types of grains and dry spices can be ground in a desired mess.
- The grinding operation is conducted at a slow speed and so it does not warm up.
- A high quality balanced emery stone wheels are provided to ensure a long life requiring no redressing from time to time.
- MARSHAL Flour Mills are mechanically well balanced which ultimately reduces noise level and electrical energy consumption.
- A V belt cover is provided to guard the Flour Mills for protection and averting accidental hazards.
- For ensuring minimal power consumption the electric motors are manufactured from CRNO low wattless electrical stamping.
- A simple adjustment device is provided for ensuring coarser and fine grinding.
- Having installed a trolley system its easier to move the flour mills from one place to another.
- We Have a balancing m/c. in our factory for day to day balancing of rotor for our electric motors which ensure smooth performance of electric motor that we manufacturer.
- We Are also testing electric load of the electric motor on the testing panel m/c.

### SPECIAL FEATURES

- MARSHAL Flour Mills does not require cumbersome cleaning after its operation because of not leaving out remnant grains or flour.
- An assurance to provide prompt after sales service.
